FOREWORD

Dear Patrons,

I am presenting You our Library Guide - virtually but with pleasure. In this colourful and illustrated guide You will find all the information about the Széchenyi University University Library and Archives.

In the year 2011 our library had a large change that we, librarians have been waiting for a long time. Tender TIOP 1.3.1 let the University made its greatest development ever: after a longterm planning and waiting we moved to a new building, new environment in February. the Library takes place in the INNO-Share building in 4500 m².

We thought to introduce you not just our present but our past, as well. We show you the beginnings, the continuation and the present with some words and photos that are the most important to our patrons. The guide guides you through the library, introduces its services.

I am asking You to read it through and if you have any questions or comments, ask our colleagues personally or via e-mail.

We are gladly at your disposal!

Csilla Tóth
executive

Services:

- Basic services: enrollment, lending, reference and reference only, copying, scanning and printing
- Online services: online catalogue, lengthening, reservation, online reference, online game, links and databases, I-share service
- Interlibrary loan
- Information literacy trainings: by curriculum or on demand for groups and for individuals

Library sources: Online Catalogue/Filters

Use filters on the left side after Searching. If you get too big record number, You have got possibility to use Exclude and Filter options as well.

The image shows a library search interface with the following components:

- Left Side Filters:** A vertical list of filter categories, each with a dropdown arrow: Source, Hungarian Online Sources, University Repository, Collection, Document Type, Document Subtype, and Language.
- Result filter Section:** Three expandable filter panels, each with a 'Filter' and 'Exclude' button:
 - Source:** Library Catalogue (1857), International Online Sources (390), University Repository (378).
 - Hungarian Online Sources:** Directory of Open Access B... (181).
 - University Repository:** Thesis (369), PHD (7), E-learning (2).
- Right Side Filters:** A vertical list of filter categories, each with a dropdown arrow: Year of publication, Author, Subject, Classification, and Item status.

What does it contain?

- Metadata (only bibliographical information)
- Full text
- Abstracts

Search options 1

Boolean operators:

- **AND**
- **OR**
- **AND NOT**

Word distance in IEEE database

- **NEAR/n** Finds the words within **n** words of one another, in any order. (IoT NEAR/5 AI)
- **ONEAR/n**: Finds the words within **n** words of one another in the order in which you enter them. (IoT ONEAR/5 AI)
-

Word distance in Scopus database

- **W/n "within"**. Where the terms in the query must be within a specified number of terms (**n**). "**n**" can be a number from 0 to 255. Either word may appear first.
 - pain W/15 morphine would find articles in which "pain" and "morphine" are no more than 15 terms apart
- **PRE/n "precedes by"**. Where the first term in the query must precede the second by a specified number of terms (**n**). "**n**" can be a number from 0 to 255.
 - behavioural PRE/3 disturbances would find articles in which "behavioural" precedes "disturbances" by three or fewer words.

Quotation marks: " "

Quotation marks can be used to specify terms which must appear next to each other, e.g.: "Heart attack"

Wildcards

***(asterisk) replace something** (zero or more characters)

{economic*} Search result: economics, economical

? (question mark) Replace just one letter

{heart?} Search result: hearts

USE CAPITAL LETTERS!

Use **parenthesis ()** if you have a combined search.

Order: NOT, AND, OR

Example (parenthesis)

▶ "natural hazard" OR "natural disaster" OR avalanche OR landslide OR earthquake OR "volcanic eruption" OR flood OR tsunami AND messag* OR warn* OR communicat* AND "artificial intelligence" OR "machine learning" OR "deep learning" OR robotics OR "neural network" OR "natural language processing"

▶ VS.

- ▶ ("natural hazard" OR "natural disaster" OR avalanche OR landslide OR earthquake OR "volcanic eruption" OR flood OR tsunami)
 - ▶ AND
 - ▶ (messag* OR warn* OR communicat*)
 - ▶ AND
- ▶ ("artificial intelligence" OR "machine learning" OR "deep learning" OR robotics OR "neural network" OR "natural language processing")
